FOREWORD

Reforms in the process of evaluation remain a desired goal in our educational policy, to which we remain deeply committed. However, at present examinations continue to be the most critical point in evaluation process. It is, therefore, of paramount importance that the examinations are conducted with utmost precision, fairness and objectivity. The system should be clear to all, participating in the process, in any category whatsoever.

It is with this end in view that I am placing this new edition of the Examination Manual in your hands. It deals with the various steps that have to be taken at all the levels associated with the holding of the examinations. Proformae for use in the preparation of records have been well drawn out.

I sincerely feel that all rules and procedures relating to the examinations should be so well delineated so as to leave nothing to chance. This Manual is symbolic of our effort in that direction.

Issues have been dealt with in this Manual from the point of view of the students, the University, the Examination Centres and the persons engaged in various operations associated with the examinations.

Suggestions for improvement in the system are always welcome.
